## Production Report for the 6 months ended 30 June 2025

### Eduardo Landin, Chief Executive Officer commented:

*"During the second quarter, we maintained a solid operational performance at both our Inmaculada and San Jose mines, generating robust operating cashflow benefiting from continued strength in precious-metal markets. As previously disclosed, we initiated a thorough review of the Mara Rosa operation in Brazil which remains ongoing and includes a temporary suspension of the plant to improve processes, perform essential maintenance work and repairs to the mechanical filters. We currently expect to report a full update of our progress and revised guidance for 2025 at our interim results in late August."*

The Company disclosed after the first quarter that operations at Mara Rosa were adversely affected by heavier-than-usual seasonal rainfall in the first few months of the year, as well as contractor performance issues. These conditions limited access to ore, particularly the higher-grade zones within the pit, and compounded ongoing challenges with the filtering processes. As a result, efforts to recover from delays in mine waste removal carried over from the previous year were further prolonged.

To rectify these ongoing issues, the Company's CEO, Eduardo Landin, temporarily assumed operational responsibilities and initiated a comprehensive review of all mining, processing and disposal activities at Mara Rosa to identify constraints to the mine's output. As part of this review, a temporary suspension of the processing plant commenced on 23 June to carry out maintenance activities and mechanical filter repairs with mining operations continuing as planned.

The manufacturer, Andritz, is currently working with the Company to optimise the filtering plant, with the current expectation being a phased ramp-up in its operation during H2 2025 to achieve the required performance levels. The team is also considering installing a tailings thickener to improve the feed into the filtration plant.

Hochschild has also recently appointed Ediney Drummond as Country Manager of Hochschild Brazil. Mr Drummond brings over 20 years of experience in the mining sector and previously served as President of Lundin Mining Brazil and currently holds the position of Vice President of the Board of the Brazilian Mining Institute.

Production of gold for the half was 28,488 ounces (H1 2024: 14,354 ounces) with revised guidance for the year expected to be disclosed by the interim results on 27 August 2025.

#### **Average realisable prices and sales**

Average realisable precious metal prices in Q2 2025 (which are reported before the deduction of commercial discounts) were \$2,940/ounce for gold and \$34.4/ounce for silver (Q2 2024: \$2,291/ounce for gold and \$30.2/ounce for silver). For H1 2025, average realisable precious metal prices were \$2,832/ounce for gold and \$33.8/ounce for silver (H1 2024: \$2,210/ounce for gold and \$27.0/ounce for silver).

#### **Advanced Project: Monte Do Carmo**

Work has continued on the Monte Do Carmo project in the second quarter and included:

- Evaluation of the use of water harvesting for the project
- Review of proposed filtration system
- Validation of pit engineering study
